Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a portable toilet shelter, classified in class 4, subclass 449.
- II. Claims 19-20, drawn to a toilet unit, classified in class 4, subclass 483.

The inventions are distinct, each from the other because: Inventions 1 and 2 are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the tank portion is not required. The subcombination has separate utility such as with or without a shelter.

Because these inventions are distinct for the reasons given above and the search required for Group 2 is not required for Group 1, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Remy Van Opham on 10/8/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication should be directed to Charles Phillips at telephone number 703-308-1515.
